CONSENT TO TREATMENT

I give permission to all providers working for Active Care Atlanta to initiate care and provide treatment to me. This authorization does not expire and is effective as long as I am a patient.

Though rare, there are risks of complications associated with all health care procedures and treatments. These complications include but are not limited to: bruising, burns, muscle spasm, fractures, disc injuries and dislocations. Some types of manipulations of the neck have been associated with injuries to the arteries in the neck leading to or contributing to serious complications including stroke.

Strokes have been the subject of tremendous disagreement. The occurrence of a stroke is exceedingly rare and is estimated to occur approximately once per 1 million to 5 million neck adjustments.

The Doctor will make every reasonable effort during the examination to screen for contraindications to care; however it's your responsibility to inform the Doctor if you have a condition that would otherwise not come to the Doctor's attention.
